

Совместимость матриц для ноутбуков или вся правда о LP156WH4

Несомненно, что перед тем как скачать этот файл вы внимательно прочитали статью (и даже две!) на нашем сайте про матрицы LP156WH4 (ну или на каком-нибудь другом). А теперь – откиньте все, что вы прочли до этого и внимательно изучите этот небольшой текст.

Внимание! LP156WH4 – это не полный партномер, кодировка не может быть присвоена какой-то определенной матрице без ее полного написания, данный не полный партномер (LP156WH4) может соответствовать как минимум 2 типам не совместимых между собой матриц. Для определения точного соответствия матрицы данному партномеру необходимо смотреть полный партномер, а именно – то, что написано после LP156WH4 в двух скобках!

По аналогии с автомобилями, неполная кодировка LP156WH4 просто сообщает, что это ширина колеса, но не указывает его диаметр и толщину поэтому к какому именно авто подойдет данное колесо сказать невозможно. То же самое и с матрицами.

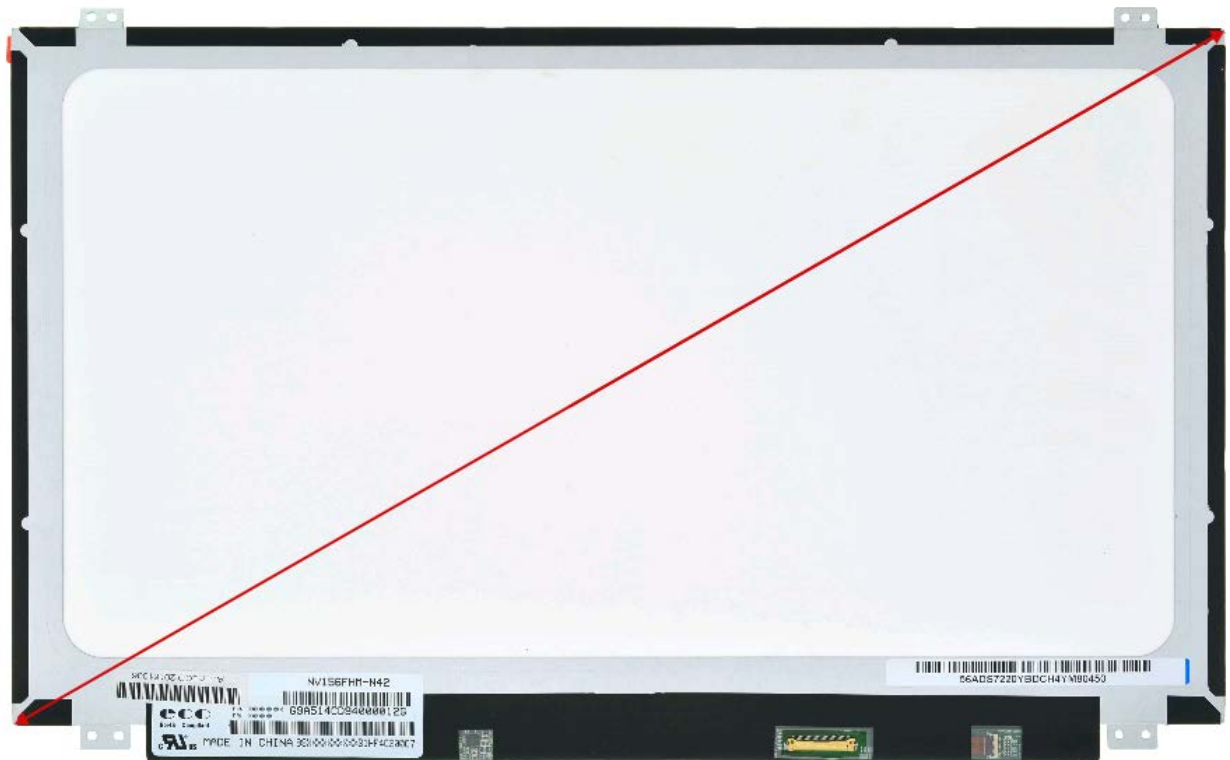

Что нужно знать, чтобы правильно подобрать матрицу для ноутбука

Кратко можно выделить 8 характеристик (начиная от самой значимой):

- 1) Диагональ
- 2) Подсветка матрицы
- 3) Толщина матрицы
- 4) Вид разъема матрицы
- 5) Расположение разъема
- 6) Разрешение матрицы
- 7) Покрытие
- 8) Дополнительные параметры

Диагональ матрицы для ноутбука

Диагональ это расстояние между противоположных углов матрицы.

Диагонали всех матриц, и не только ноутбучных, как правило, измеряются в дюймах. Диагональ - это самая главная начальная характеристика. Если у вас матрица диагональю 15,6 дюймов, то Вы ни как не сможете установить вместо нее 17,3 дюйма, потому что она попросту не войдет по размеру. Диагональ матрицы всегда указывается производителем в партномере матрицы.

Будь то - LP156WH4(TL)(N3), F2156WH4, LTN156AT15-C04 или N156B6-L03, во всех этих партномерах выпускаемых разными заводами, мы видим, что диагональ матрицы – 15,6 дюймов

Итак, зная партномер матрицы, мы без труда сможем определить ее диагональ без лишних замеров

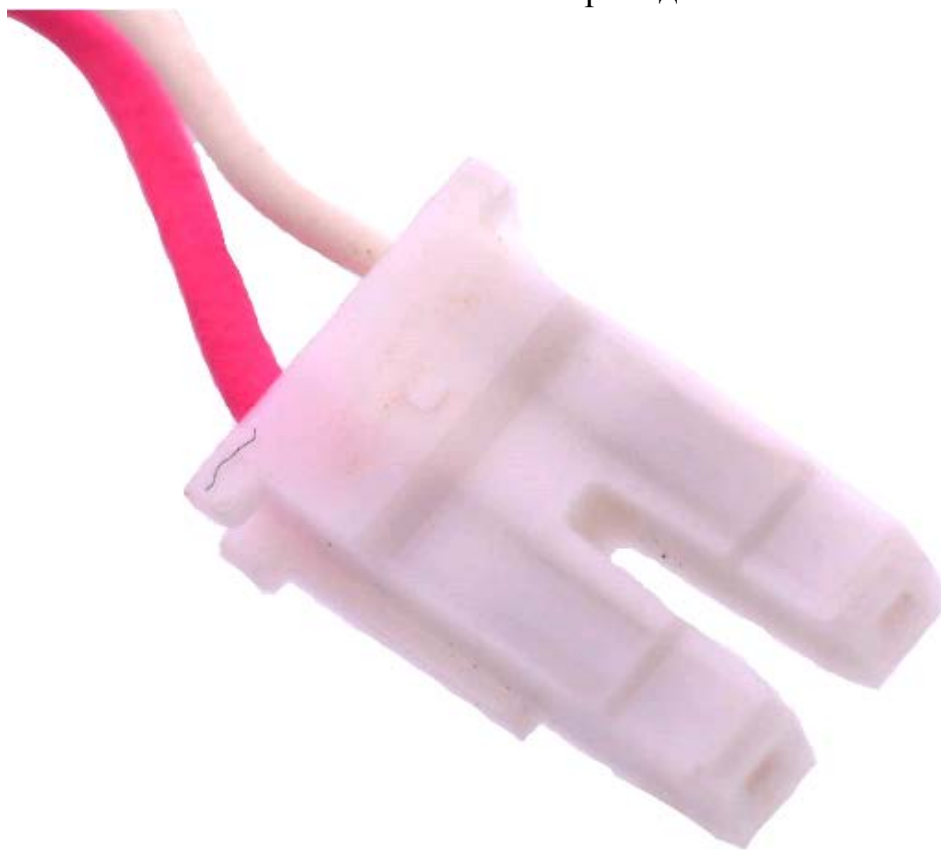

Подсветка матрицы

Не менее важной характеристикой является подсветка матрицы. Подсветка матрице нужна для того, что бы мы видели, что происходит на матрице. Подсветка – подсвечивает изображение матрицы. Если бы ее не было, или когда она ломается, то можно разглядеть на матрице ее тусклое изображение. Подсветка может регулироваться с ноутбука. Она может быть нескольких типов для ноутбуков, а именно:

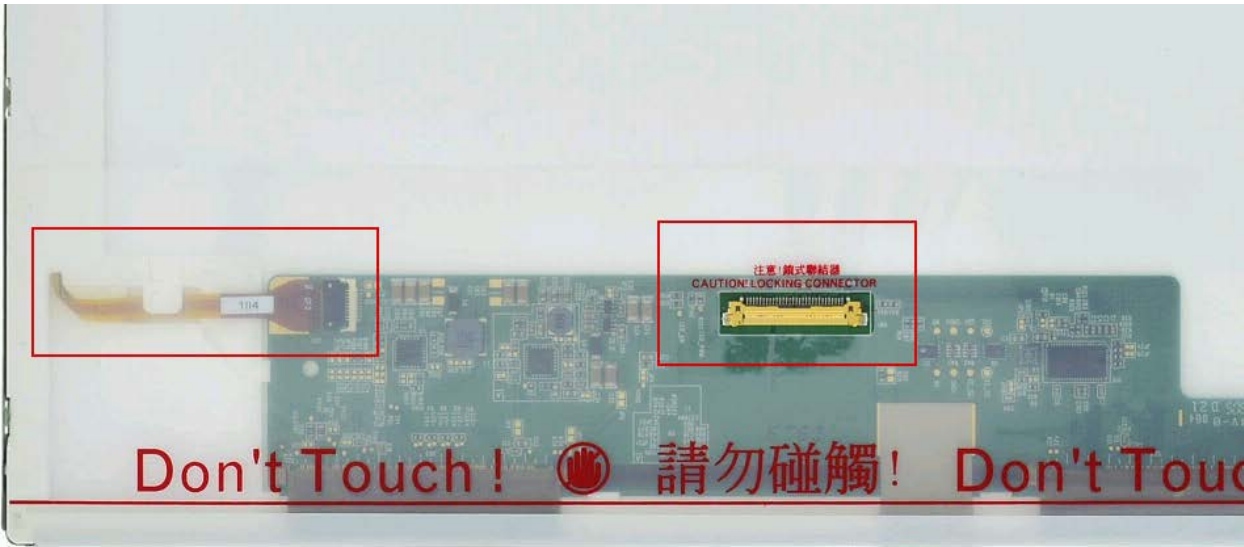

А) ламповая - еще обозначается как – CCFL. Чаще всего устанавливалась на относительно старых моделях матриц, до того как в нашу жизнь пришли светодиоды. Ламповая подсветка - это просто длинная лампа внутри матрицы, которая передает свет через фильтры на матрицу и далее нам в глаза ☺

Б) Так же подсветка может быть светодиодной LED. Самая часто используемая на данный момент подсветка ввиду ее характеристик.

У старых ламповых подсветок конвектором подключения был 2-х пиновый проводок

у светодиодных же подсветка подключается напрямую в плату матрицы и не имеет отдельного подключения

Толщина матрицы

Так сложилось на рынке матриц, что выделяют 2 основные толщины - это 5 мм (также называют Normal) и 3 мм (так же зовутся – SLIM), одну вместо другой поставить нельзя. Не влезет или будет болтаться. Слимовые матрицы применяют на тонких ноутбуках или ультрабуках. В остальном они ни чем не лучше обычных, разве что гораздо больше подвержены механическому повреждению.

NORMAL – 5 MM

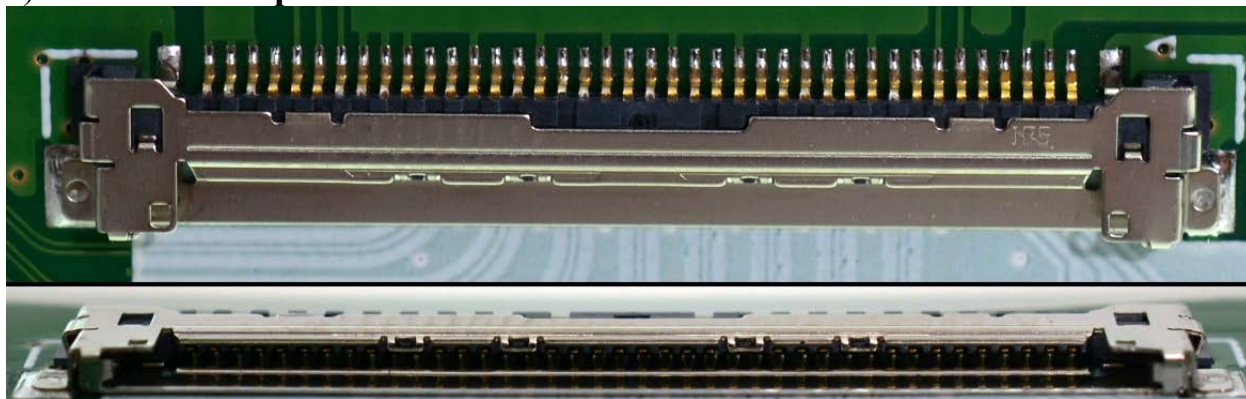

SLIM - 3 MM

Вид разъема матрицы

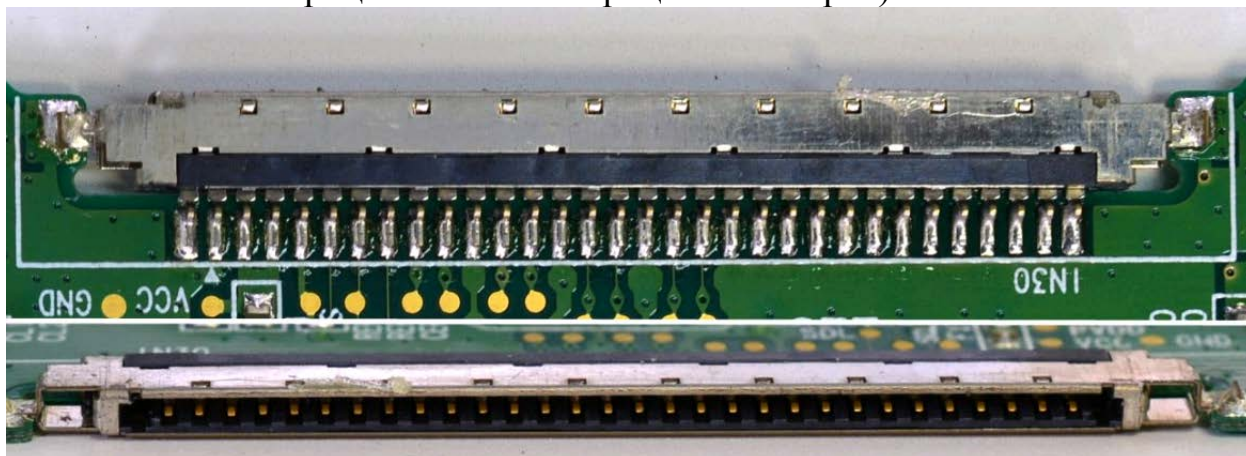

Видов разъемов очень много. Расскажем лишь о самых распространенных используемых в ноутбуках. Разъемы разделяют: 1) по количеству пинов (ламелей подключения); 2) по шагу (расстоянию между пинами); 3) по технологии подключения. Разъемы можно определить по виду (см. фото).

Самыми популярными разъемами являются:

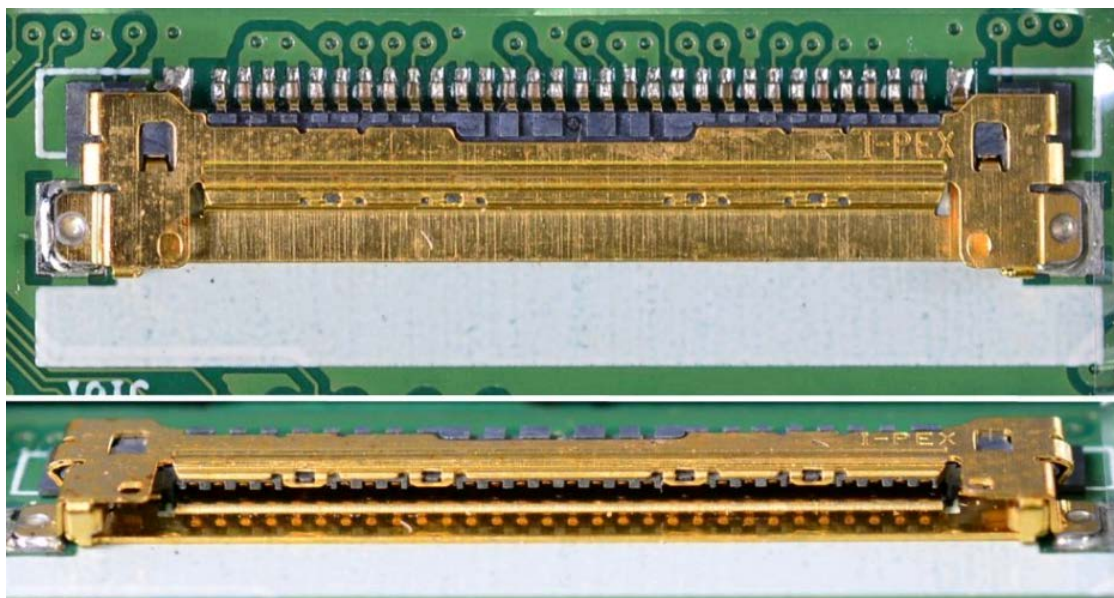

а) **40 пин LVDS разъем**

б) **30 пин** широкий разъем с шагом 0,5мм (старый разъем используется вместе с ламповыми матрицами или на матрицах мониторов)

в) **30 eDP** – наиболее современный разъем с технологией eDP

Разъем является важным параметром, Вы не сможете подключить вместо 30 пинового – 40 пиновый разъем (есть только отдельные случаи со специальными переходниками, EDP и LVDS разъемы нельзя подключить даже ими)

Расположение разъема это то место где располагается разъем при условии что шлейф матрицы от материнской платы идет снизу. Расположение разъема менее важный параметр так как с помощью удлинителей можно решить данную проблему. Однако лучше всего использовать нужную матрицу с нужным расположением разъема

Разъем располагается слева внизу:

Разрешение матрицы

Самые распространенные из современных разрешений матрицы:

А) 1366x768 пикселей – HD (самое распространенное)

Б) 1600x900 – HD+

В) 1920x1080 – Full HD

Разрешения могут устанавливаться разные в зависимости от того какое разрешение более удобно для пользователя, чем разрешение выше тем лучше и дороже стоит матрица.

Однако не все видеокарты на ноутбуках могут поддерживать высокое разрешение. А именно если у вас стояла матрица высокого разрешения и вы хотите поставить более низкого то она без проблем заработает. Например, с 1600x900 на 1366x768. Если же вы надумали поставить более высокое разрешение вместо низкого. То сначала нужно убедиться что видеокарта, установленная в вашем ноутбуке сможет поддерживать это разрешение. Это без проблем можно уточнить на сайте производителя видеоадаптера.

Покрытие матрицы

Покрытия матрицы всего два - глянцевое (самое распространенное) и матовое.

Говорят, что матовое меньше бликует и так далее. Но это кому – как. На самом деле покрытие - это только пленка, наклеенная сверху матрицы – матовая или глянцевая. Ни на что другое она не влияет. Вы без проблем можете поставить глянцевую матрицу вместо матовой и наоборот. (не очень важный параметр).

Дополнительные параметры

Дополнительным параметром может быть индивидуальная прошивка, наличие доп. креплений или битность матрицы, матрица может не заработать даже при условии совпадения всех вышеперечисленных параметров (встречается редко, например парт номер - B140XW01 V.9 из за своей прошивки подходит только для Samsung или матрица - LP140WH6(TJ)(A1) из-за своих физических особенностей подходит только к модели ноутбука - Dell XPS 14z)

Вернемся к партномеру - LP156WH4

Итак, теперь мы можем сказать что LP156WH4(TJ)(A1) например подходит только к параметрам матрицы - 15.6" / LED / Normal (5mm) / 40 pin слева внизу / 1366X768

НО! LP156WH4(TP)(P1) имея разницу только в написании после скобок, уже относиться к другому виду матрицы, а именно - 15.6" / LED / Normal (5mm) / 30 pin eDP слева внизу / 1366X768

Как мы видим они различаются коннектором подключения: 30 pin eDP и 40 pin, что является важным параметром. Матрицы не могут быть взаимозаменяемы!

Вот почему стоит искать по полному парт номеру матрицы.

А теперь – ВНИМАНИЕ!

Ниже мы приводим список совместимости парт номеров и моделей ноутбуков к самой популярной в мире матрице с параметрами:

15.6" / LED / Normal (5mm) / 40 pin слева внизу / 1366X768

Все эти парт номера могут быть совместимы между собой. Если в данном списке Вы не смогли найти своего партномера или модели ноутбука., то попробуйте поискать через наш сайт – <https://4ip.info/> или уточнить совместимость у наших менеджеров!

(Совместимые модели ноутбуков - через девять страниц ☺ и до бесконечности)
